

Agrozyme Odour Control Data Sheet

Agrozyme Odour Control Data Sheet

Overview

- **AGROZYME ODOUR CONTROL** uses a 100% natural non-toxic formulation that eliminates odour, lowers FOG.

Product Description

- **AGROZYME ODOUR CONTROL** is a highly concentrated formular with an emphasis on odour control, reduce ammonia, breakdown urea, FOG into nitrates and other odourless compounds.
- **AGROZYME ODOUR CONTROL** is a Singapore product and is made in Singapore.

Usage Instructions

Odour Control Bioreagent

- Best applied with the consultation from our technical team as dosages depends on treatment systems, BOD/COD, type and concentration of organics and mixed chemicals, desired outcomes and expectations.

Product Specifications

Agrozyme Pure is a blend of microbial enzymes:

- Proteases
- Lipase
- Amylase
- Urease
- Cellulase
- Nitrate Reductase
- Various degradative enzyme systems to degrade organics, urea, chemicals and ammonia.

Product Characteristics

- | | |
|------------------------|-----------------------------------|
| ▪ Appearance: | White powder |
| ▪ Temperature Range: | 5°C - 55°C |
| ▪ pH Range: | 6 - 10 |
| ▪ Oxygen Requirements: | Aeration Required |
| ▪ Packaging: | 25kg box (250 x 100g packs) |
| ▪ Shelf life: | 24 months from day of manufacture |

Storage

Keep material and container tightly closed. Store at dry, cool conditions. Keep out of direct sunlight. Best storage temperature range from 5°C - 55°C.
